Django Frontend is a collection of static files and templates to jumpstart Django front-end development.

With the convenience of an installable Django application, easily add some of the most widely used static files and create custom templates built on top of one of the most well-known, widespread templates ([HTML5 Boilerplate](#) .)

Package <https://pypi.python.org/pypi/django-frontend>

- [jQuery Smooth Scroll \(1.7.2\)](#)
- [Twitter Bootstrap \(3.3.7\)](#)
- [Font Awesome \(4.6.3\)](#)

2.1 Getting Started

2.1.1 Install

1. install *django-frontend* (pip install, add to your requirements files, etc.)
2. add 'djfrontend' to your INSTALLED_APPS
3. make sure 'django.contrib.staticfiles' is also in your INSTALLED_APPS

2.1.2 Extend

Extend djfrontend's base template in your template(s)

```
{% extends 'djfrontend/base.html' %}
```

2.1.3 Load

Load all the djfrontend tags if you want to add or change the template's defaults.

```
{% load djfrontend %}
```

2.2 Granularity

Version 1.0.0 introduced a new level of granularity by including template tags with a default value, which can be overridden in settings, which in turn can be overridden by passing the template tag an argument. This allows you to change default values within settings, while giving a template tag final word.

If you use an optional value other than the ones listed, you will have to add the files into the same directory structure as djfrontend.

Template tag	Setting	Default Value	Optional Value(s)
	DJFRONTEND_STATIC_URL		
django_frontend_h5bp_html	DJFRONTEND_H5BP_HTML	len	ISO 639-1 codes

django_frontend_ga	DJFRONTEND_GA		
	DJFRONTEND_GA_SETDOMAINNAME		
	DJFRONTEND_GA_SETALLOWLINKER		

2.3 Template tags

Use the included `django_frontend` template tags to suit your needs.

2.3.1 `django_frontend`

Loads all the Django Frontend template tags.

```
{% load django_frontend %}
```

Each template tag now has a default value. You only need to include an argument if you wish to change the default.

2.3.2 djfrontend_h5bp_html

Returns HTML tag according to chosen language. The default, 'en' is used if another language is not set.

```
{% djfrontend_h5bp_html %}
```

renders:

```
<html class="no-js" lang="en">
```

2.3.3 djfrontend_h5bp_css
